(TMI Newsletter – November 2014)

We Hear You've Been Asking About the Professional Division and the Professional Seminar

What about the PD? What is the Professional Seminar? Here's the scoop:

The Professional Division is a corps of TMI frontier scientists and practitioners - a unique group with a longer than 30-year global tradition of breakthrough research and reporting on the Institute's consciousness development technologies. Professional members are responsible for most of the substantial body of work published independently as well as through the *TMI Journal*.

If you use Hemi-Sync®, SAM, or TMI methods in your professional work, you may qualify to become a Professional member. Bob Monroe founded the Professional Division as a way to further ongoing investigation into the application of Hemi-Sync® with patients, clients, students, and subjects. He was vitally interested in how the technology could be of value in more mainstream health and wellness areas.

The Professional Division has been a tremendous boon to the Institute during the past three-plus decades, with exciting, innovative work being done by members in many countries. The resulting published articles, reports, and studies, many of which are available on our website, have served multiple purposes ...
